**DETAILED ACTION**

***Allowable Subject Matter***

1. Claims 1-31 are allowed.
2. The following is an examiner's statement of reasons for allowance: the cited prior fails to teach Applicant's claimed invention, a dividing section which divides each inputted first and second digital image signals into plural macro blocks of orthogonal-transformation blocks for each frame thereof; a shuffling section which, for each of the first and second digital image signals, rearranges the macro blocks in each frame into groups and creates macro block units for every group; and a compression-encoding section which compression-encodes, based on the frame rate, each of the first and second digital image signals for every macro block unit consisting of plural macro blocks rearranged by the shuffling section, wherein the shuffling section rearranges the macro blocks of the first digital image signals such that an output order of the macro block units of the first digital image signals after compression-encoding at the first rate is equivalent to the output of the macro block units of the second digital image signal after compression-encoding at the second frame rate.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
